- Projects are required to provide the total energy savings of the measure(s). Energy savings analysis must be supported by existing and proposed facility data, such as operating schedules, EMS/BMS data, etc.; standard assumptions and baseline must be set in cases where EMS/BMS data is unavailable.
- In absence of energy analysis or model, Pre and post installation M&V may be required. Adjusted savings calculations may be required depending on the results of the metering.
- The energy savings calculations must only include the energy savings related to the custom measure(s).
- **Certain measures may require pre and post install M&V for savings validation. In such cases, data points essential to analyzing the savings will be communicated and depending on the SOW, pre and post data measurement timeframe will be set; in case acceptable EMS/BMS data is unavailable, a separate M&V will be required for the set timeframe.**
- Proposed measures will not be eligible for Custom Measure incentives if a Prescriptive incentive is available. Proposed measures must meet or exceed mandated/industry standards & codes where applicable. Applicability of codes & standards will be determined by PSE&G's engineering staff during the application review process.
- **State energy code is ASHRAE 90.1-2016. In cases where ASHRAE 90.1-2016 does not apply, other applicable industry standards will be used, such as the Consortium for Energy Efficiency (CEE), EPA ENERGY STAR, Design Lights Consortium, NEMA, Federal Title 10 or other established resources such as: current New Jersey baseline studies and other market research; experience of the New Jersey utilities; or utility/public program experience from other comparable jurisdictions.**
- Final rebate/incentive payment is based upon installed equipment specifications, operating data, and final energy savings, and may be lower than preapproved amount.
- Program approval is required prior to purchase and installation for custom measures.
- Custom project incentives are **capped at 50% of total project cost.**
- Customer/Contractor must complete and submit Data Collection Forms (DCF) for measures as communicated by PSE&G engineering team. Note that DCFs are available for most measures mentioned in the below table. Anywhere a DCF is not available or developed, customer/contractor must submit supporting information detailing the measure parameters required for energy savings analysis.
